

# ERGO

**ERGONOMIC. CONVENIENT. EFFICIENT.**

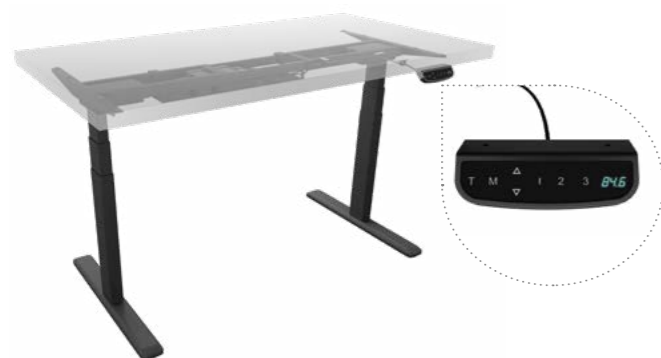

If you look for a description of the term ergonomics, you'll find various examples. The idea is to achieve a high quality work result according to the given requirements, aided by a structured organisation, but at the same time applying as little effort as possible.

With this definition in mind, RaidSonic Technology GmbH is using it's own brand ICY BOX to bring more and more products on to the market that reduce fatigue, increase productivity and have a positive overall effect on the workflow.

# #CREATEYOURWORKSPACE

## ERGONOMIC TABLE SOLUTIONS

**Electric desk frame  
IB-EW205B-T/IB-EW206B-T**

- For desktops with a width of 1000-1650 mm  
IB-EW206B-T: basic model
- For desktops with a width of 1000-1700 mm  
IB-EW205B-T: robust model
- Electric height adjustment from 62 to 128 cm and storage function for 3 height settings
- With timer for sit/stand reminder
- 2 motors for loads up to 125 kg with overload protection
- Collision avoidance system
- Power supply with ON/OFF switch for energy saving
- Cable management tray

**Electric desk frame  
IB-EW207B-T**

- Electric height-adjustable sit/stand desk frame in L-shape
- For two table tops at right angles to each other, each 1200 to 2000 mm long
- Electric height adjustment from 62 to 128 cm
- Two extendable arms for mounting table tops of different sizes
- Storage of three freely selectable height settings
- 3 motors for a load of up to 150 kg with overload protection
- Collision avoidance system
- With power supply unit

**Cable management solution  
IB-MSA104-CM**

- Keeps a neat and clean appearance, all cables elegantly stowed away
- Installed beneath the desk, it adapts to height positions within 124 cm
- Cables can be organized by type and function in four different compartments
- The weighted base keeps the cable management system properly in position
- Eliminates tripping hazards

FLEXIBLE

SAFE

**Ergonomic footrest  
IB-EWA111-FT**

- Improves posture by elevating the legs
- Surface equipped with acupressure points to support blood circulation and stimulate the soles of the feet
- Three height settings: 10 cm, 12 cm, 15 cm
- Tilt angle from 40° to -6°
- Non-slip feet for good stability

**ORDER AND  
RELAXATION**

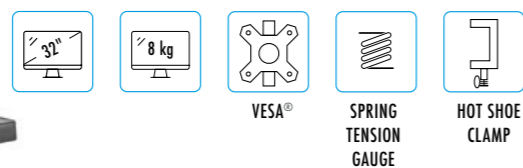

# FOR THE RIGHT ANGLE OF VISION

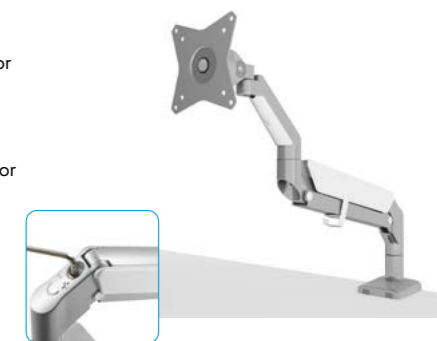

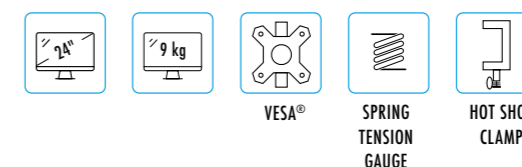

**Monitor stands  
IB-MS314-T/IB-MS313-T**

- For one or two monitors up to 32" (81 cm)
- Easy adjustment of the monitors in height, rotation and inclination
- Built-in spring tension gauge: for perfect weight adjustment of the monitors
- Spring-assisted mechanism: allows to easily move the monitor up and down
- Accessory for hot shoe clamp and table feed-through included
- Quick-release VESA® plates in 75x75 and 100x100 for easy monitor installation
- With cable management system

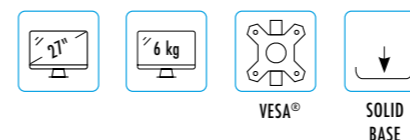

**Monitor stands  
IB-MS514-TSS/IB-MS513-TSS**

- For one or two monitors up to 32" (81 cm)
- Freely swivelling monitor arm for different viewing angles on the monitor
- Extra short arm sections for particularly flat positioning of the monitors near the wall
- Stepless height adjustment for an ergonomic sitting position
- Built-in spring tension gauge for perfect weight adjustment of the monitor
- Optional mounting with hot shoe clamp or table feed-through

**Monitor stands  
IB-MS113B-T/IB-MS113WH-T**

- Quick-release VESA® plates for easy monitor installation
- 10-step height adjustment for an optimal viewing angle on the monitor
- Non-slip silicone pads protect the work surface from scratches and scuffs
- For monitors up to 27" (68 cm) and 6 kg weight
- The solid base provides stability

**Notebook holder  
IB-NH300**

- Holder made from aluminium for notebooks up to 17"
- Brings your notebook screen to eye level
- Adjustable Z-shaped design ensures an ergonomic sitting position
- Better cooling due to slots in the tablet surface
- Protective rail to prevent the notebook from slipping down
- Silicone pads for a firm grip
